Walmart Global Tech & Vendor Alignment Playbook

Client: Walmart Inc. (Supply Chain & Omnichannel Retail Domain)

Document Version: 2026.4.1 | **Classification:** External Vendor Confidential

1. Ways of Working (WoW)

Our engagement with Walmart Global Tech operates under a strict **Scaled Agile (SAFe)** framework, fully synchronized with Walmart's quarterly Product Increment (PI) planning cycles. The teams run bi-weekly sprints (2 weeks) terminating in standard production deployment windows.

Core Rituals & Communication Cadence:
• **Daily Standup (09:30 AM IST):** 15-minute alignment run via Slack and Jira sync.
• **Sprint Planning:** Occurs alternate Mondays, governed by Product Managers from Walmart Bentonville.
• **Refinement Sessions:** Every Wednesday to ensure the backlog has a minimum 2-sprint runway.
• **Retrospectives & Demo:** Alternate Fridays, evaluating delivery velocity against target metrics.

2. Engineering Standards & Guardrails

All vendor deliverables must pass Walmart's automated DevOps gatekeepers before staging production merges:
• **Code Quality:** Minimum 85% unit test coverage verified via SonarQube dashboards.
• **Security Compliance:** Zero Critical or High vulnerabilities found during Veracode/Checkmarx scanning.
• **Definition of Done (DoD):** Code peer-reviewed by at least one internal Walmart Tech Lead, documentation updated in Confluence, and change validation signed off in lower test environments.

3. Team Rosters & Squad Allocations

Vendor engineers are currently segregated into two high-priority tracks inside Walmart Tech:
• **Squad Alpha (Store Inventory Systems):** Focuses on real-time item tracking, edge ledger optimization, and low-latency API wrappers.
• **Squad Beta (Omnichannel Checkout Pipelines):** Focuses on microservices handling digital wallet routing, spark delivery logistics integrations, and checkout tokenization.

4. Team Performance Metrics (Sprint 4 Datagrid)

The grid below records verified deliverables mapped during the recently concluded Sprint 4 evaluation window:

Engineer	Team / Squad	Story Points Committed	Story Points Delivered	Bugs Logged	Code Review Score

Eli	Squad Alpha (Inventory)	12	12	0	95%
Sarah	Squad Alpha (Inventory)	8	8	1	92%
John	Squad Beta (Checkout)	13	10	3	84%
Priya	Squad Beta (Checkout)	10	10	0	98%
Marcus	Squad Alpha (Inventory)	11	9	2	88%
